HE big hits that everyone is singing right now-the catchiest, brightest songs of the day are here for your enjoyment on Columbia Records with so much snap, life and genuine good singing that you'll vote them the best you have ever

Voices, recording, accompaniments—the songs and the way they are rendered on these records will rouse all the enthusiasm you have. These are the songs and records you want!

"Where the Black-Eyed Susans Grow"

Columbia Record A2208, 750. Popular Sam Ash sings "I'm Going Back to a Shack Where the Black-Eyed Susans Grow" in a way that makes this catchy, bright tune an invita-tion for you to come back with him, too. On the other side is the ballad success, "After You've Had Your Way."

For Me and My Gal"

Columbia Record A2190, 75c. Ragtime at its best, syncopated joy—a swinging, jingling tune that will set your shoulders swaying—here is a wedding song that's a hit indeed! And "Cross My Heart and Hope to Die" is the funniest "kid" song ever.

"Poor Butterfly"

Columbia Record A2206, 75c.

Here is the finest tenor rendition of this greatest song-hit in years. Charles Harrison's fine voice brings out all the feeling in the touching little story of "Poor Butterfly," and the string accompaniment of the refrain has a poignant quality that will grip your heart. Charles Harrison sings another classic, "My Rosary For You," on the other side. With those other genuine hits, "If I Had a Son for Each Star in Old Glory" (A2209, 75c) and "She's Dixie All the Time" (A2210, 75c), here you have five records you should not miss hearing. And once you hear them, you will

THE DICTAPHONE

The executives of business houses will note with a very special interest the action of that prosperous St. Louis corporation, the Shapleigh Hardware Company, established for 74 years.

In May, 1915, this Company was so struck by the claims made for The Dictaphone that it investigated. Two Dictaphones were installed, and a searching test was made, over a fair period, of their ability to stand up under the daily grind of heavy correspondence.

The result: Today 79 Dictaphones are in use in the Company's offices.

It is apparent that a company may be old and yet be progressive, and that this readiness to keep pace with the times is an essential factor in long prosperity.

Whatever date your business was established, it can use The Dictaphone to advantage. A demonstration will be arranged at your pleasure.

Nothing gives such moral impetus as resisting and expelling invasion. The deepest qualities of the soul are roused by it, qualities whose roots run through centuries of ances tries and are implicit in all our thought.

The Russian, the Roumanian, the Serbian and Montenegrin, even in a modified form the Italian, have this element in their morale, and as the war goes of it cannot but count more and more in the balance of endurance and power.

But there is another tremendous factor in morale. That is hope of victory. Here, too, the allies are on the upgrade, the central armies on the down. The latter are fighting today for terms, the former for victory. The British army has just arrived at its own proper level of efficiency. It has learned the game and coordinates like a beautiful chine, as the German machine did, as the French does. It is winning victories. It is proving superiority at this point and that. The French army has been a well nigh perfect machine, but now it has the support of an equally efficient and ng allied army. It does not have to worry st the British will be able to hold or lest they will blunder, as at Neuve Chappelle, in the attack.

Only on the eastern front is there still weaknes in the allied forces. Russia is in a critical, perhaps a desperate, condition. But just as hope begins to revive a little for the Germans in that direction the shadow of a new foe falls across the field, a new foe, unready, inexpert, but huge and capable of ning of its enormous power.

The greatest blow that could be struck at the serale of the central powers at this time, and therefore the greatest blow for speedy peace, is the nstration of America's determination to fight at the earliest effective moment with the maximum

WHAT UNIVERSAL SERVICE WILL DO. [From the Chickasha Express.]

The constitution of the United States in its preamble declares that one of the objects of forming the union was to provide for the national defense, and the constitution in express terms makes it the duty of the federal government to protect the states both from invasion and pro hibits the states from engaging in war, even in their own defense, unless the exigency is so immediate and pressing that the state which is threat ened has not time to call on the federal govern

Under these circumstances that the nation should depend upon the state militia for its defense is an ertraordinary anomaly. The govern ment, which is required to equip itself for the defense of the nation, is left without equipment. If universal military training would interfere with the pacific pursuits of the American people that objection might conceivably justify our resorting to the militia of the states, which is organized for a totally different purpose. But, in act, universal military training properly organized would promote the pacific pursuits of the American people.

It would develop a habit of prompt obedie

It would develop the team spirit, the habit of cooperation for a common purpose.

It would break down class barriers and put imployer and employed, rich and poor, on th same level, engaged in the same undertaking, and thus greatly promote the democratic spirit. Typhus has an incubation period of about ten days. In one Iowa case the incubation period seemed to be at least twenty-one days. Typhus begins with a high fever, headaches, and general aching. The fever stays high. The tongue is heavily coated.

Dr. Witherspoon of El Paso tells me that in typical severe typhus the patient is as sick after a two days' illness as a constipation among other causes. Among symptoms are headsches and dizziness. The test is made by throwing a rubber tube around the arm, pumping air into the tube until the wrist pulse is stopped, and readtyphoid victim is in the third week of his illness. Examination of the blood shows ab-

Undergarments that would make Cleopatra envious

The slaves of Cleopatra travelled thousands of miles over deserts and mountains to secure silk undergarments for their luxury loving queen.

How Cleopatra would envy the shimmering silk undergarments of the women of today!

It remained for our generation to produce a silk underwear fabric finer, more exquisite than ever produced before, yet durable enough to be really economical—Kayser Italian Silk

The highest compliment you can offer

Every woman longs for the luxury of silk undergarments. To give Italian Silk Underwear to your friends is the highest compliment you can pay them. It is a tribute to their own exquisiteness. Kayser Italian Silk Underwear makes the most delightful gift for every occasion right through the yearbirthdays, Easter, Christmas, Commencement. It is an ideal engagement and wedding present.

Women who have never known the luxury of wearing Italian Silk Underwear are delighted to be introduced to it. Women who have worn it appreciate the gift immediately. They can never have too much.

Kayser makes and tests every inch of its own fabric. The highest quality pure silk is used. Only pure silk will wash and wear and retain its beauty the way Kayser Italian Silk does.

Kayser garments are planned by skilled designers and cut by hand. All sizes are full sizes. There is no skimping in length or width. All garments are carefully shaped. That is why they fit as though made to order. Each garment is cut individually by hand. All reinforcements are extra large.

Kayser has standardized the weights of silk underwear as well as the sizes and indicated these weights on the labels. One star (*) on the label indicates the light weight garment; three stars (***) the heavy weight. (There is also a five star (****) weight—a special weight made for those who like extra heavy undergarments.)

Protect yourself by this label

Insist on seeing the Kayser label—if it isn't Kayser, it isn't Italian Silk. By insisting on the Kayser label, you are assured of getting undergarments that will launder beautifully -undergarments that fit as though made to order and that will wear for years; and best of all a fabric as exquisite as human hands can

You simply apply a few drops of freezone upon a tender corn or painful callus and instantly the soreness disappears, then shortly you will find the corn or callus works like a charm. Try it!

A noted Cincinnati chemist discovered a new ether compound and called it freesone and it now can be had in the bottles for a few cents from any drug store.

So loose, that you can just lift it off with the fingers.

No pain, not a bit of soreness, either when applying freezone or afterwards, and it doesn't even irritate the

its citizens without compensation?

-that there are now stored in Government Bonded Warehouses, over 211,000,000 gallons of whiskey and other spirits?

-that distillers have given bonds to the Government for over \$232,000,000 for payment of taxes on these goods?

that prohibition would confiscate not only the millions lawfully invested in distillery property, but also the millions of gallons stored in bonded warehouses, and would confiscate bonds to the extent of \$232,000,000—an amount greatly in excess of the total capital and surplus of all the bonding companies in America -so that the Government would lose \$232,000,000 taxes?

These conditions exist because the government-in order to provide pure and mature goods—has decreed that whiskey may remain in bond 8 years and, if bottled in bond, must remain in bond 4 years for bottling purposes.

The Constitution of the United States guarantees that private property shall not be taken nor destroyed for the public good, without due compensation

Prohibition is alleged to be for the public good. Prohibition as now proposed is ruthless confiscation. From every standpoint of American justice, should not the cost be borne by the Government-state or national-decreeing it? Confiscation without compensation is un-American and contrary to the Constitution of the United States.

The liquor industry has paid to date over six billion dollars in taxes to the Federal Government, and is now paying nearly \$1,000,000 per day.

We ask a just and equitable consideration of the economic, moral and financial problems of proposed Prohibition.

The supreme need of the allied democratic nations is food. In Montana there are millions of acres of rich virgin land awaiting the plowshare to convert them into food producing areas.

Go to Montana-go now. It is your opportunity to serve your country in its present crisis and to help yourself to future independence.

In the quality of its grains and yield per acre Montana stands first — yet land there can be bought at reasonable prices. There is not another State in the Union where a day's work or a dollar spent in agricultural enterprise will bring such large returns and amid living conditions which are so uniquely delightful.

Our brother is evidently unaware of the fact that there are many notable fly casters who wear national tournament medals as a reward for their ment medals as a reward for their ment medals as a reward for their prowess in the art of fly casting, who indulge to a great extent in balt casting, but along widely different lines than those described by our would-be nemesis

Herewith are equipments used by such casters:

Split bamboo bait casting rod, 8 cunces, 714 feet in length, and weighing 4 to 6 cunces, which is as light as the average fly rods.

Needless to say, such rods are of sufficient resiliency as to describe almost any geometrical curve produced with a fly rod.

Light tournament casting lines, at least one-fourth the diameter of an enameled fly line.

Files as light as No. 6 (lighter than some salmon files) with a tiny spinner in front, combined weight of batt, not over 14 oz. Heels with aluminum spool and handle.

Batt casting with such equipment eliminates the club, siab of bacon, and various treble hock plugs, etc., and gives Mr. Fish all the freedom of a fly rod—in fact, he can siroll farther away, swing to greater length of line.

The writer personally prefers fly to bait casting, but both methods, done properly, are wonderfully fascinating

The writer might add that a member of the Illinois Casting club, recognised as an adept with a fly rod, took a 23 pound muskle on a 6 foot 3 inch 5% ounce batt rod with a line testing 7 pounds' strength. Needless to say, the fisherman did not literally drag this muskle out of the water with his multiplying real.

N this picture we have our old Blanche Sweet again. Not our OLD Blanche Sweet, but the Blanche Sweet that Griffith gave us, as she was and worked under the magic of his direction. Since that time she has always been more or less of a satisfac-tion, but in "The Tides of Barnegat" she is Blanche Sweet the Great.

The picturization of F. Hopkinso

Smith's famous story, which deals strongly and intimately with the lives of certain fisher folk near the famou bay on the Jersey coast, has been adeptly accomplished. No mere "play acting" do we witness. We live right along with the people who depict the tale, and in some spots the living grows pretty

If you read the book you have not forgotten it. You will remember the two sisters of Barnegat, one of whom was wise and the other foolish, though at times you are led to doubt as to which, after all, was the wise one. For all things came, you see, the frivolous one way, and the sister who sacrificed—sac rificed just about everything. She, school teacher in the colony, took upor when the latter, succumbing to the wiles of a young naval officer, is left a prospective mother, but neither wife nor

The elder sister, Jane, as played by Miss Sweet, and the younger (Norma Nichols) go away before the birth of the child. The younger sister, after months of quiet living, grows weary and begins to buzz about, leaving her child to the devoted care of her elder sister. She meets and is loved by a wealthy chap. whom she has told that the child is her sister's, the sad fruit of a secret marriage. With his family and himself she remains in Europe, while Jane, at the end of her savings, goes back to Barnegat with the baby, where she is an ob ject of scorn and derision and the child a pitiful little outcast.

HIGH GASOLINE STANDARD OIL'S **FAULT, CHARGE**

Trade Commission Urges **Reopening of Trust** Litigation.

Washington, D. C., April 24.-Domini tion of the gasoline industry by Standard Oil interests, the federal trade comnission reported to the senate today, has been largely responsible for high gasoline prices of the last two years.

The report declares interlocking stock ownership prevents any real competition among the various Standard Oil companies, and the commission recom mends legislation to permit reopening of the oil trust case.

No conclusive evidence was found, it is stated, that collusion exists among the Standard companies in violation of the decree, but the commission's findings have been transmitted to the attorney general.

Prices are declared to have been raised arbitrarily, although natural causes contributed. Pronounced price inequalities were found in different parts of the

CLUB OPPOSES **NEARING'S VIEWS**

Prof. Scott Nearing spoke at the Englewood Sunday Evening club last Sunday night and through a typographical error in THE TRIBUNE of Monday morning it was made to appear that the speech was delivered at the Sunday Evening club, the word "Engiewood" having been omitted.

In calling attention to the error Clif-ford W. Barnes, president of the Sunday Evening club, says he has received sev eral letters expressing surprise that Prof. Nearing should have been per-mitted to speak under the auspices of the club, the membership of which is not in sympathy with the hisarre anti-war notions of the educator. Mr. Barnes

says further: Meanwhile the real Sunday Evening club was having a pro-war meeting with: 3,000 people packed in the audience room and about 2,000 turned away, and we were just completing a \$5,000 contribu-tion to the Y. M. C. A. war fund." The original, chartered Sunday Even-ing club, of which Mr. Barnes has been president since its foundation years ego, meets regularly through the autumn

New Silks-13,600 Yards In a Tremendous Silk Purchase

The human mind is a queer thing—taken individually or collectively. It is very valuable to know how it works sometimes.

Using initiative lately, when this great collective human mind was momentarily hesitating in its decision whether or not to go right ahead doing things, resulted in one of the greatest and most advantageous single purchases of silks we have ever made.

Ranking at the top in the silk world, the manufacturers from whom these vast quantities of new silks have come are not only weavers of silks, they are creators of silks and silk fashions. Their 1917 productions are the most beautiful, most original they have ever created—they

8,200 Yards of Spring and Summer Silks are Priced at \$1.55 Yard

Silks for out-of-doors apparel, plain Shantung silks, novelty printed silks, sports wear silks, plaid and striped Shantung silks, novelty Shantungs, sports silks of beautiful, original, fascinating designs, in the high sports colors and in softer effects, in solid colors as well as in weaves that are new, different, and that have captivated fashion.

These great assortments display a wonderful range of plain colors and striking color combinations in stripes and plaids and designs truly original, as well as those adapted from the Japanese. All are 36 inches wide, and all, irrespective of prices at which they are universally selling, are marked \$1.55 yard.

5,400 Yards of Plain and Printed Genuine Georgette Crepes Are Priced at \$1.35 Yard

The genuine Georgette crepes, pure silk, 40 inches wide, printed in highly effective designs and in plain colors, are offered in this immense assortment.

The colors include ivory, flesh, pink, ciel, Nile green, blue, rose, white, black and the leading darker colorings, for street and home wear. Not in all our silk experience have we noted greater value in similar silks of this kind. \$1.35 yard.

Friendly under bare feet in the bedroom-or under innocent knees and fingers on the nursery floor, yet firm and durable under the constant tread of hard heels. That's Deltox-the grass rug that's now used in every room in the house the whole year around.

are woven from long, strong fibre grass. They hold their pe on the floor—sanitary—easily cleaned by shaking weeping. Made in many beautiful original designs tatch any color scheme or room furnishings.

Indian Beadwork Taught by a Native Teacher

The romantic symbolism of the Indian race has been converted by them into patterns wrought in Beads. This work is so artistic—so decorative—many women are learning the art to apply their knowledge to the making of beaded bags, girdles and hair bands. It is particularly interesting to

Camp Fire Girls who can select a design and make accessories in keeping with the character of their or-
